Caluso 35, 10125 Torino, Italy

Deadline for manuscript
submissions:

closed (15 December 2019)

Message from the Guest Editor

Archaeometry is a multidisciplinary research field, focused upon the application of scientific methods to the analysis of artworks and archaeological materials. In this context, the study of mineralogy in its various branches can play a fundamental and strategic role, as most minerals enter the composition—as main and accessory constituents—of objects related to cultural heritage.

This Special Issue will focus on the application of mineral-related disciplines to the analysis of cultural heritage items, such as artworks, ancient artefacts, archaeological materials, and historical buildings. Papers centered on these themes, discussing up-to-date methodological studies on materials of historical and artistic relevance, will be welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
