Message from the Guest Editors

Dear Colleagues,

We welcome papers that describe LPOs and deformation microstructures of minerals and rocks in the crust and mantle, and that give fresh insight into how LPO and microstructures develop and evolve through time, reflect deformation conditions, and influence large-scale geodynamic processes. We encourage contributions from field observations, laboratory experiments, and numerical modeling on geologic materials over a wide range of conditions, length scales, and time scales.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
