

Ore Mineralogy and Geochemistry of Rare Metal Deposits

Guest Editors:

Prof. Dr. Vasilios Melfos

Department of Mineralogy,
Petrology and Economic
Geology, Faculty of Geology,
Aristotle University of
Thessaloniki, 54124 Thessaloniki,
Greece

Prof. Dr. Panagiotis Voudouris

Faculty of Geology &
Geoenvironment, National and
Kapodistrian University of
Athens, University Campus, GR-
15784 Athens, Greece

Deadline for manuscript
submissions:

closed (25 May 2021)

Message from the Guest Editors

Rare metals occur in diverse deposit types and are mined in substantial quantities that meet the world demands. By definition, rare-metal deposits hardly occur in technically and economically exploitable, worthy concentrations and have high monetary acquisition costs...This Special Issue welcomes contributions on original research which presents new data from rare-metal deposits, focusing mainly on mineralogy and mineral chemistry studied with several techniques, e.g., optical microscopy, Raman, SEM, EPMA, LA-ICP-MS, SIMS, TIMS, PIXE, PGNA, QEMSCAN, and others. We focus on the mineralogy of Bi, Ta, Co, V, Te, W, Se, Re, Ga, Ge, In, Cd, Hg, Li, Rb, Sr, Be, Y, Ce, Nd, Sc, Au, Ag, U, Th, the REE-Lanthanides, and the Platinum Group Elements (PGE). These data will contribute significantly to the knowledge about the distribution of rare metals in specific minerals for a possible future exploration and exploitation.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GEOBASE, GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
