# Tectonic Evolution of Orogens: Metamorphic Petrology, Structural Geology, Geochronology and Geochemistry

Guest Editors:

## Prof. Dr. Yonghong Shi

School of Resource and Environmental Engineering, Hefei University of Technology, Hefei 230009, China

#### Prof. Dr. Fukun Chen

School of Earth and Space Sciences, University of Science and Technology of China, Hefei 230026, China

#### Dr. Jiahao Li

School of Resource and Environmental Engineering, Hefei University of Technology, Hefei 230009. China

Deadline for manuscript submissions:

closed (31 October 2022)

# **Message from the Guest Editors**

Dear Colleagues

An orogenic belt is a key region for the exploration of the plate coupling process and earth evolution history, and its accurate structural framework, metamorphism, deformation and age sequence are crucial for understanding the formation mechanism of the orogenic belt.

# **Message from the Editor-in-Chief**

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef,

CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
