Geochronology, Crystallography and Phase Transition in Shocked Minerals

Guest Editors:

Dr. Elizaveta Kovaleva

Dr. Matthew Huber

Dr. Martin Clark

Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

In recent years, geoscientists have significantly improved their understanding of planetary processes relating to the evolution of the Earth, moon, Mars, and other rocky bodies in our solar system. These breakthroughs became possible, in part, due to developments in high-resolution analytical techniques, [...] This Special Issue will include studies of impactites and planetary materials with a focus on geochemistry, geochronology, and phase transitions of rock-forming and accessory mineral phases. Such contributions should shed light on planetary tectonics and especially hypervelocity impact events.

We cordially invite you to express your interest and to submit contributions to this Special Issue.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef,

CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
