

## Special Issue

# 3D Technologies and Machine Learning in Mineral Sciences

### Message from the Guest Editor

Recent advances in 3D technologies and machine learning (ML) are transforming the field of Mineral Sciences. From the digitization of mineral specimens to AI-driven predictive modeling, these innovations are reshaping both scientific research and cultural heritage applications in museums, collections, and geoscience education.

### Guest Editor

Dr. Andrei Ionuț Apopei

Department of Geology, Faculty of Geography and Geology, "Alexandru Ioan Cuza" University of Iași, 700505 Iași, Romania

### Deadline for manuscript submissions

30 September 2026

## About the Journal

### Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
