# **Special Issue**

# Arsenic Pollution: Sources, Speciation and Remediation Strategies

## Message from the Guest Editors

This Special Issue invites submissions that include original scientific research related to the problems associated with elevated concentrations of arsenic in the environment, from both natural and human-made sources. The Special Issue focuses on the following topics: (1) the sources of arsenic in the environment and assessment of related risks; (2) arsenic speciation, mobility, bioavailability, and biogeochemical transformations; (3) remediation of environments highly enriched in arsenic, with a special focus on arsenic-contaminated soils and sediments.

## **About the Journal**

## Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### **Fditor-in-Chief**

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth, Germany

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
