

Special Issue

Metallurgical Solid Waste: Mineralogy, Chemistry and Application/Treatment, 2nd Edition

Message from the Guest Editors

The objective of this Special Issue is to collate pioneering studies that document recent advancements in the bulk utilization of metallurgical solid wastes. We welcome submissions focusing on mineralogy research and application/treatment of metallurgical solid wastes (steel slag, desulfurized fly ash, red mud, anode slime, tailings, etc.), including the cross-industry collaborative resource utilization of multi-source solid wastes, and new near-zero waste approaches of metallurgy. We particularly invite papers on recycling and reusing, as well as the sustainability and inexpensive production of high-value, clean products using metallurgical solid wastes.

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
