

Special Issue

Chromite Deposits: Mineralogy, Petrology and Genesis

Message from the Guest Editors

This Special Issue will focus on recent advances in the study of geology, mineralogy, and geochemistry of chromite deposits from different geological settings for improving our knowledge in chromite ore formation. Contributions dealing with experimental mineralogy and petrology of chromite and related minerals are also welcome.

Guest Editors

Dr. Evgenii Pushkarev

Institute of Geology and Geochemistry, Ural Branch, Russian Academy of Sciences, 620000 Yekaterinburg, Russia

Prof. Dr. Giorgio Garuti

Geosciences Programme, Faculty of Science, Universiti Brunei Darussalam, Jalan Tungku Link, Gadong BE1410, Brunei

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth,
Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
