

Special Issue

Mineral Deposits of Central Europe

Message from the Guest Editors

The Special Issue devoted to “Mineral deposits in Central Europe” offers a forum to present the geological features of the traditional mining regions in Central Europe as well as new discoveries, exploration models, and processing and application techniques related to high-tech metals and to the varied spectrum of non-metallic commodities such as clay minerals, silica raw materials, volcanic rocks and lightweight aggregates. Ornamental stones and gemstones, highly estimated for their aesthetic value are not excluded. The regional constraints of the study area may be deduced from the mineral and resources map on the scale 1: 2 500 000 published within the scope of the most recent overview of fossil fuels, ore and industrial minerals in Central Europe by Dill et al. (2008). The Keywords are:

- Classical base metals
- electronic/strategic elements
- industrial minerals
- ornamental stones
- exploration models
- processing
- Central Europe

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth,
Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
