

## Special Issue

# Gold Deposits in Russia: Geology, Mineralogy and Ore Genesis

### Message from the Guest Editors

The purpose of our Special Issue is to present to the international geological community new data on gold deposits of various types, common in different regions of Russia. Currently, in the study of gold deposits, the interests of geologists have shifted from purely geological observations to mineralogical, isotope-geochemical and fluid-geochemical studies, using modern precision analytical methods, which are welcome when it comes to invited publications. This makes it possible to present new data on the genesis of ores for already known objects. The structure of the Special Issue is supposed to present new data on three large gold-bearing areas: the Ural, Siberian and Far East, and new data on the European gold-bearing areas of Russia are also welcome. We will focus on authors whose research is related to orogenic and epithermal types of gold ore mineralization.

## About the Journal

### Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
