

Special Issue

Mineralogy, Petrology and Geochemistry of Crustal Rocks

Message from the Guest Editors

We invite contributions on the mineralogy, petrology, and geochemistry of crustal rocks. The Special Issue will showcase studies of crustal processes across all scales, ranging from planetary processes on the scale of crustal differentiation and global tectonics, to regional and local phenomena on scales ranging from terrane, outcrop, hand-sample, mineral and lattice. Contributions that integrate quantitative and qualitative techniques, including spectroscopy and micro-analysis, with field-based studies and observations, as well as studies of natural crustal materials, experimental analogues, and theoretical models will be welcomed.

Guest Editors

Dr. Callum Hetherington

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut, University Bayreuth, D-95440 Bayreuth,
Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
