

Special Issue

Metallic Minerals and Other Geomaterials in the Mediterranean Area: From Archaeology to Current Resources

Message from the Guest Editor

The Mediterranean area has been of key importance for the history and development of human culture, as well as for geological knowledge. This Special Issue on "Metallic minerals and other geomaterials in the Mediterranean area: from archaeology to current resources" will collect contributes of original research that present both archaeometric investigations of metal and non-metal artifacts from archaeological sites and mineralogical, geochemical and petrographic investigations of metallic minerals from deposits basically related to the Mediterranean domain.

About the Journal

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
