

Special Issue

Advanced Techniques to Improve Collaborative Business Process Management into Blockchain Context

Message from the Guest Editors

Over the last decade, the use of process engineering principles in numerous environments is accepted worldwide as a mechanism to increase the excellence, productivity, competitiveness, efficiency, and quality of any kind of organization as well as to reduce costs. In this context, BPM (Business Process Management) is a well-known business strategy to achieve these goals while obtaining various advantages. Moreover, over the last decade, new technology has emerged that could provide a technological solution to execute and manage Collaborative Business Processes (CBP). We refer to Blockchain Technology (BCT), which offers valued cost reductions by enabling transactions to be run peer-to-peer, directly between entities or individual users. This execution can be carried out without requiring mutual trust between each party.

This Special Issue aims to gather both academic and industrial communities that intend to submit their contributions on the abovementioned topics, thus advancing modeling techniques, approaches, or methods to improve collaborative BPM in the BCT context.

About the Journal

Message from the Editorial Board

We encourage you to contribute a research or comprehensive review article for consideration and publication in *Modelling* (ISSN 2673-3951), an international open access journal, which is published quarterly online by MDPI. The editorial board and staff of *Modelling* are dedicated to providing an advanced forum for studies related to the development and applications of modelling and simulation techniques. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications.

Editors-in-Chief

Prof. Dr. Alfredo Cuzzocrea

1. DISPES Department, University of Calabria, 87036 Rende, Italy
2. Institute of High Performance Computing and Networking, Italian National Research Council, Via P. Bucci, 7/11C, 87036 Rende, Italy

Prof. Dr. Wei Gao

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Ei
Compendex, EBSCO and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2
(Mathematics (miscellaneous))
