

Special Issue

Synthesis of Ionic Liquids

Message from the Guest Editors

The focus of this Special Issue "Synthesis of Ionic Liquids" is to collect **Short Notes or more extensive Communications** describing new ionic liquids. We are especially looking for articles on novel synthetic approaches, significant process changes in already known ionic liquid synthesis procedures or new efficient purification procedures. Research articles should contain more than one of the following significant results: design and synthesis, spectroscopic and structural characterization by proton and carbon nuclear magnetic resonance (^1H and ^{13}C NMR), infrared spectroscopy (FT-IR), ultraviolet and visible spectroscopy (UV-Vis), elemental analysis, physicochemical properties. Studies which demonstrate any application area of the prepared ionic liquids are more than welcome.

About the Journal

Message from the Editor-in-Chief

Molbank is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper ("short notes") as well as "communications". The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. *Molbank* offers an excellent platform for preserving the aforesaid kind of information.

Editor-in-Chief

Prof. Dr. Nicholas Leadbeater

Department of Chemistry, University of Connecticut, 55 North Eagleville Road, Storrs, CT 06269-3060, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Reaxys, CAPIus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
