

## Special Issue

# Metal-Catalyzed Synthesis

### Message from the Guest Editor

This Special Issue is devoted to metal-catalyzed synthesis, which is one of the most important tools in modern synthetic organic chemistry. In fact, under the catalytic action of a metal center, stabilized by suitable ligands, different small molecules can be sequentially activated to afford complex, high-value added compounds in one synthetic step. Although enormous progress has been made in this field during the last few decades, this kind of chemistry is still very attractive and important, and will continue to attract the interest of chemists, both in academia and industry around the world.

## About the Journal

### Message from the Editor-in-Chief

*Molbank* is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper ("short notes") as well as "communications". The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. *Molbank* offers an excellent platform for preserving the aforesaid kind of information.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Reaxys, CAPIus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
