

Special Issue

Photocatalysis

Message from the Guest Editor

Light-driven organic chemical transformations have become a hot topic in organic synthesis in the last years. In this context, photocatalysis using visible-light has emerged as an efficient tool for generating structural complexity and for straightforward synthesis of complex molecules. The focus of this Special Issue is to present papers that cover the synthesis of a single compound or a family of compounds using photocatalysis. All contributions on this topic are encouraged. Sufficient experimental details and characterization data should be included to facilitate other researchers in accessing the new compounds

About the Journal

Message from the Editor-in-Chief

Molbank is a unique electronic journal that rapidly publishes very short articles, which typically encompass one compound per paper ("short notes") as well as "communications". The aim of this format is to prevent potentially useful scientific information from being lost. In many research groups, there are unpublished compounds that are available, which do not truly fit into a full paper or even a conventional short paper, e.g. because the main work in a series of compounds has already been published. Nevertheless, somebody else might be interested in just this particular compound. *Molbank* offers an excellent platform for preserving the aforesaid kind of information.

Editor-in-Chief

Prof. Dr. Nicholas Leadbeater

Department of Chemistry, University of Connecticut, 55 North Eagleville Road, Storrs, CT 06269-3060, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Reaxys, CAPIus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
