

Joint Special Issue

Molecules from Side Reactions II

Message from the Guest Editors

It is with great pleasure that the second edition of the Special Issue "[Molecules from Side Reactions](#)" is launched, following the success of the first edition. This Special Issue aims to make available to the scientific community information on the side reactions and side products that inevitably take place during total or multistep syntheses. The submission of research articles covering all of the fields of organic chemistry is welcome. Due to the special nature of this topic, the reaction yields are not a key element in assessing the quality of the submitted research. You may choose our [Joint Special Issue](#) in *Molecules*.

Guest Editors

Dr. Stefano D'Errico

Department of Pharmacy, University of Naples Federico II, Via Domenico Montesano 49, 80131 Naples, Italy

Prof. Dr. Annalisa Guaragna

Department of Chemical Sciences, University of Naples Federico II, Via Cinthia 21, 80126 Napoli, Italy

Deadline for manuscript submissions

closed (31 August 2023)
