Message from the Guest Editors

Dear Colleagues,

Free radicals are the cause of many civilization diseases, such as cardiovascular diseases and cancer. Plants provide us with a great tool to fight free radicals, namely antioxidants. Research on the antioxidant potential of plants is an important and still developing branch of science. This Special Issue aims to provide a forum for dissemination of the latest information on this area. Research on the antioxidant potential of extracts from plants, both soil and in vitro, as well as research into metabolites with antioxidant activity are our focus. We look forward to receiving your contribution to this Special Issue.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
