Message from the Guest Editor

Dear Colleagues,

The development of science and technology has given us a lot of benefits. Chemistry is a field that has greatly contributed to this development. Applied chemistry covers a variety of chemical fields, considering on various materials, including metal compounds, inorganic and organic compounds, polymers, proteins, etc., focussing on basic researches and their applications.

This Special Issue is designed to gather review papers in applied chemistry. We kindly invite and encourage all research groups covering various applied chemistry areas to make contributions to this Special Issue.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
