Deadline for manuscript  
submissions:

**closed (31 August 2023)**

### Message from the Guest Editor

Dear Colleagues,

Porous carbon materials have versatile applications in the modern world. Different varieties of carbon exist, including activated carbon, nano carbon, soft and hard templated mesoporous carbon, carbon fibers, or biochar. Out of all of the applications of carbon-based materials, this Special Issue of *Molecules* invites papers that specifically target the application of carbon-based materials towards sustainability. These applications include, but are not limited to, carbon capture, air purification, water purification, trace contaminants removal, and sensing and removal of chemical warfare agents. Synthesis of carbon-based materials by a sustainable approach will also fall under this category.

Prof. Dr. Dipendu Saha

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
