Deadline for manuscript
submissions:

closed (30 November 2019)

Message from the Guest Editor

Dear Colleagues,

During recent years, DNA nanotechnology has taken significant leaps towards real-life applications, as programmable and fully addressable DNA nanostructures have provided a plethora of intriguing implementations—for example, in drug delivery, plasmonics, biochemistry, biology, nanofabrication, super-resolution imaging, as well as mechanical and dynamic molecular devices. Advanced design methods and software have enabled a customized and straightforward synthesis of complex DNA nanostructures for manipulating materials at nanoscale and for harnessing them in a user-defined way. I am hereby pleased to announce that scientifically valid and technically sound papers related to any aspect of DNA nanotechnology—with an emphasis on the emerging trends in the field (listed as the keywords)—will be considered for this Special Issue. Each manuscript will be handled by the editorial board and peer-reviewed by referees.

Adj. Prof. Dr. Veikko Linko

Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
