Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue collects original research articles and comprehensive reviews. It focuses on results from laboratory animals but not from animal cells or human patients. Research and reviews with the following topics are welcome:

1. Comprehensive reviews focusing on summaries or comparisons of the therapeutic effect of a category of compounds, components, natural products, or herbal extracts on a specific animal model of human disease;
2. Original research articles using a novel, modified, or well-established animal model of human disease to screen or test potential drugs, natural products, or herbal extracts, showing the molecule mechanisms of their functions.

Prof. Dr. Ming-Shiun Tsai

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
