Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

This Special Issue is related to the antifungal and the antiviral activities of natural products, herbal extracts, and generally extracts of natural origin. Secondary metabolites are largely found in plants, marine organisms, bacteria, fungi, and insects. Natural products are the most successful source of leads for potential drug discovery and play a highly significant role in medicinal chemistry.

We are particularly interested in manuscripts dealing with the most recent research on natural sources with antifungal and antiviral activity, including extract preparations, bioactive secondary metabolites, isolation and structure elucidation, metabolomic analyses, bioassays, mechanisms of action, SAR studies.

You are welcome to visit the [Website](#) and submit your paper [here](#)

We look forward to receiving your contribution!

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
