Message from the Guest Editors

This Special Issue is dedicated to the 45th anniversary of the career of Prof. Wiesław Oleszek in recognition of his outstanding scientific contributions to natural plant metabolites research.

- isolation, identification, construction, and occurrence of natural products in plants
- analysis in various matrices
- biotechnology
- application in the pharmaceutical industry
- application in human and animal nutrition
- importance in the ecosystem.

You are welcome to visit the [website](#), submit the **abstract**, and **full paper** to the Special Issue. Any questions please feel free to contact the managing editor Larry Li (larry.li@mdpi.com).

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
