Deadline for manuscript submissions: closed (30 April 2019)

Message from the Guest Editors

Dear Colleagues,

Na/K-ATPase non-ion pumping functions have been the focus of hundreds of publications in the past 15 years. We believe that the time has come to gather a collection of papers by active contributors of this ever-growing field in a Special Issue. We envision this Special Issue as a unique opportunity for the reader to survey the different facets of Na/K-ATPase signaling, growing evidence of its impacts on fundamental aspects of biology, and its prospects as a therapeutic target in a number of diseases. This Special Issue will contain contributions discussing all the aspects broadly indicated by the keywords. Reviews articles by experts in the field will also be welcome. Prof. Zijian Xie

Dr. Sandrine Pierre Guest Editors

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
