Message from the Guest Editors

Dear Colleagues,

This Special Issue invites researchers to present their new research, as well as review articles devoted to the study of methods for obtaining and characterizing the properties of magnetic nanomaterials, including nanoparticles, nanotubes, nanowires, and thin films and composite nanostructured ceramics. Research in the field of application of magnetic nanomaterials, including such areas as targeted drug delivery, magneto-optical sensors, etc. are among the most urgent and promising works in the modern world. However, these are not the only topics of this Special Issue; other works on magnetic nanostructures are also welcomed for publication.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
