

## Organic Pollutants: Detection, Environmental Fate and Remediation

Guest Editors:

**Prof. Dr. Armando Zarrelli**

Department of Chemical  
Sciences, University of Napoli  
Federico II, Via Cintia 4, I-80126  
Napoli, Italy

**Prof. Dr. Marcello Brigante**

Institute of Chemistry of  
Clermont-Ferrand (ICCF),  
Department of Chemistry,  
University Clermont Auvergne,  
Clermont-Ferrand, France

**Prof. Dr. Marco Guida**

Department of Biology, Hygiene  
Laboratories: Water, Food,  
Environment, University of  
Naples Federico II, Naples, Italy

Deadline for manuscript  
submissions:

**closed (30 November 2019)**

### Message from the Guest Editors

The term emerging contaminants (EC) includes various biologically active substances of anthropic origin such as personal care products, drugs, psychoactive substances associated with drug addiction, and related metabolites. The presence of EC in water is considered one of the most significant environmental problems of the last decade.

This Special Issue is intended to highlight the most recent advancements and trends within the framework of emerging pollutants. Research papers and reviews illustrating the most interesting developments related to sample preparation, separation science, spectroscopic and analytical techniques, sensors and biosensors, as well as the characterization of derivatives and evaluation of their acute and chronic toxicity are welcome.

We warmly invite our colleagues to submit their original contributions to this Special Issue in order to provide updates regarding the chemical fate of drugs/biological active molecules and their derivatives on the environment and the evaluation of their properties.

We would be delighted if you could respond to confirm your contribution and the proposed title by 30 November, 2019.

an Open Access Journal by MDPI

Biology and Phytochemistry,  
University of Münster,  
Corrensstrasse 48, D-48149  
Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
