# Tetrapyrrolic Macrocycles: Synthesis, Functionalization and Applications 2018

Guest Editors:

### Prof. Dr. Maria G. P. M. S. Neves

Department of Chemistry and LAQV-REQUIMTE, University of Aveiro, 3810-193 Aveiro, Portugal

### Dr. M. Amparo F. Faustino

LAQV-REQUIMTE, Department of Chemistry, University of Aveiro, 3810-193 Aveiro, Portugal

#### Dr. Nuno M. M. Moura

Department of Chemistry and LAQV-REQUIMTE, University of Aveiro, 3810-193 Aveiro, Portugal

Deadline for manuscript submissions:

closed (31 January 2019)

## **Message from the Guest Editors**

Dear Colleagues,

Natural and synthetic macrocycles, such as porphyrins, corroles, phthalocyanines, and others, are considered strong candidates to be used in different fields, such as catalysis sensing, medicine, development of advanced biomimetic models, and materials science.

All these applications, strongly-dependent on the availability of compounds with adequate and specific structural features, can justify the high investment of different researcher groups to synthesize and modify natural and synthetic porphyrin derivatives or analogs. This Special Issue, following the success of the first one in 2016, aims to provide a forum for the dissemination of the latest information on the synthesis and functionalization of tetrapyrrolic macrocycles and their potential applications.

# **Message from the Editor-in-Chief**

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
