### Message from the Guest Editor

Dear Colleagues,

Deregulation of transcription factor genes are frequently observed in various human diseases. Understanding the molecular pathogenesis as well as the development of therapeutic approaches are crucial to further advance the treatment outcome. Although the feasibility of transcription factors as therapeutic targets has long been realized, the development of drugs is still very challenging due to several pharmacological and biological reasons. Therefore, an improved knowledge is necessary to make transcription factors “actionable”. The second edition of this Special Issue aims to provide a forum for the dissemination of the latest information on new approaches and methods targeting transcription factors, and with methods of testing their success in cancer or other human diseases.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
