Recent Advances in the Development of Antiviral Agents

Message from the Guest Editor

Dear Colleagues,

Viral infections inflict many serious human diseases, especially in the most developing countries, with very high mortality rates. New drug-resistant strains are continually emerging due to the high viral mutation rate, which makes it necessary to develop novel and possibly more potent antiviral compounds. All researchers working in this field are cordially invited to contribute original research papers or reviews to this Special Issue of *Molecules*, which will report on the design, synthesis, and evaluation of novel antiviral drug or microbicide candidates against viral infections, the identification of novel biological targets or therapeutic approaches and rationale, or studies about antiviral resistance mechanisms and strategies to prevent and/or circumvent them.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 13.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2019).
