Message from the Guest Editors

Dear Colleagues,

Compounds from honeys and propolis have a great antibacterial and healing activities. We propose the applications of these substances to control and prevent of infections caused by different microorganisms (e.g., bacteria, fungi, and virus), including multidrug-resistant (MDR) microorganisms. Different bees (*Apis mellifera* and Meliponini) can be involved in the studies. Analyses must be focused on active molecules from these products with applications in the health field.

Prof. Dr. Gerson Nakazato

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
