Deadline for manuscript
submissions:

closed (28 February 2013)

Message from the Guest Editor

Dear Colleagues,

Calixarenes and resorcinarenes are families of macrocyclic species that have become a broad field of chemical research over the past few decades. This area flourishes and is vibrant today as these molecules are studied in areas such as catalysis, molecular recognition, sensing, and devices. At the forefront, researchers around the world are developing yet more elaborate molecular and supramolecular chemistry of these versatile molecules and expanding their application into previously unexplored fields. With this special issue of *Molecules*, we seek previously unpublished manuscripts on the chemistry of calixarenes and resorcinarenes, including their synthesis, structure, properties, and applications.

Dr. Jordan L. Fantini,

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
