Message from the Guest Editors

Dear Colleagues,

The alarming increase of chronic diseases has become a prominent problem for many industrialized countries and emerging economies with both societal and economic consequences. Among non-pharmacological interventions, nutritional recommendations represent a feasible means of developing preventive strategies against chronic diseases. A number of studies suggest that plant bioactives have protective effects against cardiovascular disease, obesity, cancer and neurodegenerative diseases. However, for many of them a clear understanding of the contribution or the exact mechanism of action as health-protecting components of our daily diet is still incomplete.

This Special Issue aims to attract and review the latest research concerning plant bioactives and the prevention of chronic diseases, focusing on the biochemical, molecular and health-promoting effects.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
