Message from the Guest Editors

Dear Colleagues,

Indoles continue to generate new chemistry as a result of their potential for reactivity and also for their central role in biological chemistry through the involvement of tryptophan. This Special Issue therefore seeks to cover a broad range of interests that include new reactivity patterns, new methods for indole transformations, the synthesis of indoles with additional fused rings, new synthetic routes to the indole framework, indole metal complexes, and aspects of medicinal chemistry incorporating indole systems. The aim of the Special Issue is to be inclusive and especially to document new and unusual features of indole chemistry.

Prof. Dr. David StC Black

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
