Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editor

Dear Colleagues,

Indole, azaindole, and indazole derivatives are the subject of intense research owing to their wide range of biological activity. These heterocycles, depending on the type of substituent and its position in the five- and six-membered rings, can form hetero- and homoleptic coordination compounds including coordination polymers and metal-organic compounds with interesting structures and properties. This Special Issue shall cover new research and review works developed so far in the field of the title compounds, with the aim of making an important contribution to the community. A combination of experimental and theoretical studies, also including the potential application of both ligands and their compounds with metal ions, are welcome.

Prof. Dr. Barbara Morzyk-Ociepa

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
