Message from the Guest Editors

Dear Colleagues,

The close relationship between food intake and health promotion is not new; it dates back to Hippocrates' famous "let food be your medicine and medicine be your food", which is still as timely as ever. In recent years, some scientific evidence has supported this statement, showing that dietary plant extracts, or bioactive compounds isolated therefrom, are able to prevent or slow chronic and degenerative diseases, making them particularly interesting from a nutraceutical point of view. On the other hand, a deep chemical investigation of functional plant extracts' constituents is needed to rationalize certain bioactivity, and in terms of efficacy and safety.

In light of the above, this Special Issue in its 2nd edition welcomes both original research and review articles that focus on food bioactive and functional constituents, and their role as health-promoting agents, together with extraction/isolation procedures from plant matrices and structure elucidation by means of spectroscopic and spectrometric techniques.

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
