### Message from the Guest Editor

Dear Colleagues,

Prof. Morten has made enormous contributions to the world of solid-phase chemistry – encompassing both peptide and organic chemistries and technologies as well as providing the first example of copper-catalyzed azide/alkyne cycloaddition chemistry. These have led to key advances and developments across the areas of combinatorial chemistry and chemical biology respectively. This issue celebrates the pioneering efforts of Morten and his enormous contributions to the peptide arena.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
