The Special Issue "Recent Advances in Molecular Cancer Therapeutics" focuses on recent advances in molecular cancer therapeutics, especially new anticancer drug discovery and development. The article may be either a full paper or a communication based on your research in molecular cancer therapeutics or may be a focused review article on some aspect of the subject. Potential topics can include but are not limited to the following research areas:

- Anticancer drug discovery and development
- Cancer metabolism
- Cancer inflammatory microenvironment
- Cancer biomarkers
- Cancer therapy
- The discovery and preclinical development of novel therapeutic agents for oncology
- Preclinical studies of approved therapeutics
- Mechanisms of drug action
- Mechanisms of drug resistance
- Biomarkers of drug response
- Novel models and technologies
- Occasional drug toxicity mechanisms

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
