submissions:

closed (30 June 2020)

Message from the Guest Editor

Dear Colleagues,

Molecular crystals from organic or organometallic compounds are important targets of research and development in material science and pharmaceutical science, because they provide extremely various structures and properties from simple components with multimodal inter- or intramolecular interactions.

Therefore, this Special Issue aims to illustrate the most recent and distinct studies of molecular crystals as viewed from organic chemistry, physicochemistry, and structural analysis.

Articles and reviews on the abovementioned topics are particularly welcome.

Prof. Dr. Hyuma Masu

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
