Message from the Guest Editors

The field of functional magnetic molecular materials is under constant development, and new fascinating compounds are reported every day, leading to new discoveries and examples of strong coupling between magnetic properties and other functionalities.

The design and construction of functional magnetic molecular materials requires the close collaboration of chemists, theoreticians, physicists, and materials scientists. Moreover, a suitable communication platform is also necessary. The following Special Issue of *Molecules* is intended to provide a useful forum for the dissemination of the most relevant and important findings in this vein, along with review contributions that summarize the recent developments in magnetic coordination polymers and MOFs, single molecule and single chain magnets, spin crossover materials, chiral magnets, ferroelectrics, multiferroics, and photomagnets.

an Open Access Journal by MDPI

Editor-in-Chief

du Vaucluse, 84029 Avignon,
France

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed by the [Science Citation Index Expanded](#) (Web of Science), [MEDLINE](#) (PubMed), [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.3 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2020).
