Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on the aspects of low-dimensional inorganic nanomaterials relevant to physical and chemical bases of materials science, magnetism in nanocomposite materials, machine-learning phase prediction for new materials, deep-learning analysis, IoT-synthesized nanomaterials, big data analysis for complicated nanomaterials, structure–property relationships, and nanostructures and nanotechnologies. In particular, studies on multi-functional nanoalloys, magnetic memory effect in nanodevices, quantum and optical confined effects, superconductivity, and high-entropy alloys will be encouraged for this Special Issue.

Prof. Dr. ShengYun Wu

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
