Message from the Guest Editor

Myrtle (*Myrtus communis* L.) is a shrub of the Mediterranean area well-known in the ancient times for its aromatic and medicinal properties. Today, the economic relevance of the myrtle industry to produce liqueurs, essential oils, dry spices, and other commodities determines the evolution of a domestication process of the species and the wide cultivation of selected genotypes. This new possibility allows available leaf and fruit biomasses of consistent quality and chemical composition. The interaction of the renewed interest for the medicinal properties of myrtle with the potential of a large-scale production has strongly increased the number of researchers working on the chemical composition of the plant.

The Special Issue is focused on the chemical composition of the food products of the myrtle, essential oils, and any other extract of potential interest, with particular attention given to the different groups of phenols widely contained in the shrub.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
