Deadline for manuscript
submissions:

closed (15 November 2021)

Message from the Guest Editors

Microbial natural products also referred to as secondary metabolites or specialized metabolites, have a strong track record as valuable lead structures for drug discovery in areas ranging from infectious diseases to cancer therapy to agriculture. This Special Issue will highlight recent studies where genome- and metabolome-mining approaches were instrumental in uncovering and characterizing new natural products. Contributions should include a description of how genome information or metabolomics methods were helpful, to support structure elucidation, for connecting molecules to biosynthetic genes, to establish a model for biosynthesis, to shed light on specific enzymatic steps during compound formation, for production improvement, or to gain insights into bioactivity, and the mode-of-action of the investigated molecules.

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
