

## Nanomaterials for Cancer Diagnosis and Therapy

Guest Editors:

**Dr. Alejandro Baeza**

**Dr. Fernando Novio**

**Dr. Juan Luis Paris**

Deadline for manuscript  
submissions:

**closed (31 May 2020)**

### Message from the Guest Editors

Dear Colleagues,

The development of precisely engineered nanoparticles able to overcome biological barriers, specifically recognize and destroy a single type of cancer cell, and accumulate preferentially in tumours, offers a new and potent arsenal to oncologists.

In this SI, we invite investigators to contribute original research articles and review articles that are related to the application of nanoparticles as multifunctional platforms in the treatment and early diagnosis of cancer. We are particularly interested in research directed toward improving the effectivity and selectivity properties of different nanoparticles for treatment or bioimaging purposes. Potential topics include, but are not limited to:

- Theranostic nanoparticles for cancer treatment
- Nanoparticles as contrast agents for bioimaging
- Nanoparticles as biosensors
- Novel therapies based on nanomaterials for cancer treatment and diagnosis
- Clinical studies and therapeutic and diagnostic efficacy of anti-cancer nanoparticles
- Biocompatibility and toxicity studies of nanoparticles for cancer treatment.

Dr. Alejandro Baeza

Dr. Fernando Novio

Dr. Juan Luis Paris

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
