Neglected Diseases: Medicinal Chemistry and Natural Product Chemistry

Guest Editor:

Dr. Ronan Batista
Department of Organic Chemistry - Chemistry Institute, Federal University of Bahia - UFBA, Rua Barão de Geremoabo, s/n, Ondina 40170-115 Salvador - Bahia - Brazil
ronbatis2004@gmail.com

Deadline for manuscript submissions:
closed (30 June 2009)

Message from the Guest Editor

Aims:
This special issue will focus on the top-ten neglected diseases as defined by the World Health Organization:

- Human African Trypanosomiasis (HAT or sleeping sickness)
- Chagas disease
- Dengue
- Leishmaniasis
- Leprosy
- Lymphatic filariasis (Elephantiasis)
- Malaria
- Onchocerciasis (River Blindness)
- Schistosomiasis (Bilharzia)
- Tuberculosis
Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
