New Frontiers on the Metabolism, Bioavailability and Health Effects of Phenolic Compounds II

Guest Editors:

Dr. Pedro Mena
Department of Food & Drugs, Università degli studi di Parma (UNIPR), Parma, Italy
pedromiguel.menaparreno@unipr.it

Dr. Rafael Llorach Asunción
Biomarkers & Nutrimetabolomic group, Nutrition, Food Sciences and Gastronomy Department, XaRTA, INSA, Campus Torribera, Pharmacy Faculty, University of Barcelona, Spain
rafallorach@ub.edu

Deadline for manuscript submissions:
30 October 2019

Message from the Guest Editors

This Special Issue should shed light on how (poly)phenolic substances are: (1) metabolized and turned into bioavailable molecules; (2) able to impact different biological processes related to human health, such as cardiovascular diseases, metabolic syndrome, neurodegenerative disorders, and certain kinds of cancer.

There is a need for addressing: (1) the catabolism of phenolic compounds by the colonic microbiota; (2) the inter-individual differences in bioavailability and bioefficacy due to the diversity of microbiota composition.

Future research should be focused on: (1) understanding the dose/phenolic intake–response relationship via pharmacokinetic studies; (2) evaluating proper biomarkers of intake.

In conclusion, this issue reviews all aspects concerning the metabolism, bioavailability, and biological properties of (poly)phenolic compounds and discuss attempts to solve current critical gaps. Novel methodologies or out-of-the-box approaches can also complement the current knowledge and assist in the study of these plant bioactives.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
