Message from the Guest Editor

Dear Colleagues,

The field of heterogeneous photocatalysis has given rise to thousands of papers. Most often, these papers are dispersed in many journals. Consequently, from time to time, there is a need for a Special Issue to provide a broad survey and address the various aspects of this field. For the readers, this Special Issue will give an attractive opportunity to obtain, more easily, information concerning the different facets of heterogeneous photocatalysis. For the authors, it will be an appropriate occasion to make their results and analyses more visible, and to show that they are active members of the scientific community in heterogeneous photocatalysis. This Special Issue will contain contributions discussing all the aspects broadly indicated by the keywords. Reviews articles by experts in the field will also be welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2019).
