submissions:

**30 September 2019**

### Message from the Guest Editor

Dear Colleagues,

In recent years, phenolic compounds from plant sources, have been the subject of an impressive number of research studies, to a large extent focused on the healthy properties attributed to diet polyphenols, including antioxidant, anti-inflammatory, antineoplastic, antidiabetic, neuroprotective, and other biological activities. Additionally, phenolic compounds isolated from toxic plants and showing cytotoxic or antiproliferative activity have been intensively investigated in view of a possible exploitation of their anticancer properties. Finally, synthetic compounds inspired to a natural scaffold may also show new and unexpected biological properties. Thus, this Special Issue aims to highlight the most recent results in the field of synthetic bioactive analogues of natural polyphenols. Original articles, as well as reviews, regarding studies on analogues of flavonoids, stilbenoids, curcuminoids, lignans, neolignans and other polyphenol-derived compounds are welcome.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
