Message from the Guest Editors

Dear Colleagues,

Porphyrrins, phthalocyanines and other porphyrin-type compounds (corroles, expanded porphyrins, pyrrole-modified porphyrins, calixpyrroles, etc.) have a tremendous impact in many scientific areas. The aim of this Special Issue is to provide a broad survey of the various aspects of these types of compounds, namely their synthesis, structural modification, properties and (potential) applications. Articles reporting recent original discoveries or reviews are welcome.

Prof. Dr. Michael Hanack
Prof. Dr. João Paulo C. Tomé
Prof. Dr. Augusto C. Tomé

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 22nd year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2018).
